

Ibrahim Sulyman

Cloud & DevOps Engineer

Professional Summary

- **Cloud/DevOps Engineer with Geology Background** - Combining B.Sc. Geology (Al-Hikmah University, 2024) with hands-on DevOps experience. Specialized in building infrastructure for geological data management, spatial analysis pipelines, and earth sciences digital transformation. NYSC completion at COMEG Council of Nigerian Mining Engineers & Geoscientists - data management for mining engineers and geoscientists. Skilled in automating geological data workflows, managing cloud infrastructure, and bridging scientific and engineering domains.
- Solid foundation in **Infrastructure as Code, Linux system administration, and cloud networking**, with a passion for delivering secure, automated, production-ready cloud solutions.

Technical Skills

 AWS Cloud Services

 Version Control, Collaboration

 CI/CD Pipelines

 Infrastructure as Code

 Configuration Management

 Containerization

 Databases

 System Administration, Bash Scripting

Tools & Technologies

- **Infrastructure as Code (IaC):** Terraform
- **Configuration Management:** Ansible
- **CI/CD & Automation:** Jenkins, GitHub Actions, Maven Build Tool, Nexus Artifact Repo, SonarQube Code Scanner
- **Cloud Platforms:** Amazon Web Services
- **Cloud Services:** EC2, Route 53, S3, VPC, DynamoDB, IAM, CloudFront, API Gateway, Lambda, CloudWatch, EFS, RDS
- **Containers:** Docker
- **Version Control:** GitHub
- **Operating Systems:** Linux (Ubuntu, CentOS, Amazon Linux)

Work Experience

- **National Youth Service Corps – COMEG (Council of Nigerian Mining Engineers & Geoscientists)**

Place of Primary Assignment – COMEG

2025 - 2026

- Managed technical data for mining engineers & geoscientists
- Developed automation scripts for geological data workflows
- Bridged IT systems with geoscience data requirements

- **Cloud & DevOps Engineer – IOTB Tech Fellowship · Remote**

April 2026 – Present

- Deployed an ERP system with Docker, Caddy, and DuckDNS
- Automated deployment pipelines with Jenkins & GitHub Actions
- Built infrastructure as code with Terraform

Cloud & DevOps Engineer (Self-Learning) – GitHub Personal Projects · Remote

Jan 2024 – Present

- Designed CI/CD pipelines with Terraform, Jenkins, Docker on AWS
- Automated server provisioning & config with Ansible
- Deployed LAMP stack & serverless apps on AWS

Selected Cloud & DevOps Projects

- **Automated Containerization** - Terraform, Jenkins, Docker, Tomcat, AWS  [View Project on GitHub](#)
- **Automated Resume Pipeline** - GitHub Actions + Node.js + Puppeteer  [View Project on GitHub](#)
- **AWS Infrastructure Deployment** - Terraform + Jenkins  [View Project on GitHub](#)
- **Configuration Management** - Terraform + Ansible + Jenkins  [View Project on GitHub](#)
- **Monolithic Java App** - Terraform, Jenkins, Maven, Nexus, Sonarqube, Tomcat  [View Project on GitHub](#)
- **Jenkins CI/CD** - Tomcat deployments  [View Project on GitHub](#)

Certifications

- AWS Certified Solutions Architect – Associate (In Progress, Target 2026)
- Linux Challenge Certificate – 30-day completion (Recent)

Education

- **B.Sc. Geology (Completed 2024)** – Al-Hikmah University, Ilorin, Nigeria *Relevant Coursework:* Sedimentology, Mineralogy, Hydrogeology, Geophysics, Structural Geology, Petrography
