

Ibrahim Sulyman

Cloud & DevOps Engineer

Professional Summary

- **Cloud & DevOps Engineer** with 1+ year of hands-on experience designing and automating secure, highly available, fault-tolerant, and scalable infrastructure on **AWS** using both **Terraform (IaC)** and the AWS Management Console.
- Proficient in creating and automating **CI/CD pipelines** with Jenkins, Github Actions, Maven, Nexus, SonarQube, and Tomcat, and automating server configuration with **Ansible**.
- Solid foundation in **Infrastructure as Code, Linux system administration, and cloud networking**, with a passion for delivering secure, automated, production-ready cloud solutions.

Technical Skills

- | | | | |
|---|--|---|---|
|  AWS Cloud Services |  Version Control, Collaboration |  CI/CD Pipelines |  Infrastructure as Code |
|  Configuration Management |  Containerization |  Databases |  System Administration, Bash Scripting |

Tools & Technologies

- **Infrastructure as Code (IaC):** Terraform
- **Configuration Management:** Ansible
- **CI/CD & Automation:** Jenkins, GitHub Actions, Maven Build Tool, Nexus Artifact Repo, SonarQube Code Scanner
- **Cloud Platforms:** Amazon Web Services
- **Cloud Services:** EC2, Route 53, S3, VPC, DynamoDB, IAM, CloudFront, API Gateway, Lambda, CloudWatch, EFS, RDS
- **Containers:** Docker
- **Version Control:** GitHub
- **Operating Systems:** Linux (Ubuntu, CentOS, Amazon Linux)

Work Experience

- **Cloud & DevOps Engineer (Self-Learning)** – GitHub Personal Projects · Remote
Jan 2024 – Present
 - Designed and deployed AWS infrastructure with **Terraform (IaC)** using modular and remote state configurations.
 - Automated server provisioning and configuration with **Ansible playbooks**, ensuring consistency and reducing manual setup.
 - Built and optimized **CI/CD pipelines with Jenkins**, integrating Docker to streamline builds, testing, and deployments.
 - Deployed and managed a **three-tier LAMP stack** and serverless applications on AWS, demonstrating cloud-native and event-driven architectures.
 - Published hands-on projects on **GitHub** to showcase expertise in automation, scalability, and infrastructure management.

Selected Cloud & DevOps Projects

- **Automated Resume Deployment Pipeline** – CI/CD pipeline with **GitHub Actions, Node.js, and Puppeteer** to generate and publish a PDF resume from HTML/CSS.
   [View Project on GitHub](#)
- **Infrastructure Deployment with Jenkins & Terraform** – Automated AWS infrastructure provisioning using **Terraform** integrated into **Jenkins pipelines**
   [View Project on GitHub](#)
- **Configuration Management with Terraform, Ansible, and Jenkins** – Provisioned AWS infrastructure with **Terraform** and automated configuration with **Ansible** using **Jenkins**
    [View Project on GitHub](#)
- **Complete Monolithic Java Web App Deployment** – Production-ready Java app on AWS with **Terraform, Jenkins, Maven, Nexus, SonarQube, Tomcat**
       [View Project on GitHub](#)
- **Serverless Web Application on AWS** – Serverless app using **S3, Lambda, API Gateway, DynamoDB** for a fully managed architecture.
    
- **Jenkins CI/CD Pipeline with Tomcat** – Automated builds and deployments via Jenkins integrated with GitHub.
   [View Project on GitHub](#)
- **Highly Available 3-Tier LAMP Stack on AWS** – Scalable LAMP stack provisioned with **VPC, subnets, NAT, RDS, ALB, and EFS**.
    

Certifications

- AWS Certified Solutions Architect – Associate (In Progress, Target 2025)
