

Ibrahim Sulyman

Cloud & DevOps Engineer (Entry-Level)

Professional Summary

Cloud & DevOps Engineer (Entry-Level) with 1+ year of hands-on experience deploying secure and scalable infrastructure on **AWS** using both **Terraform (IaC)** and the AWS Management Console.

Proficient in designing and automating **CI/CD pipelines** with Jenkins, Maven, Nexus, SonarQube, and Tomcat, as well as automating server configuration with **Ansible**.

Strong foundation in **Infrastructure as Code**, **Linux system administration**, and **cloud networking**, with a passion for delivering automated, production-ready solutions.

Technical Skills

AWS (EC2, S3, VPC, RDS, Lambda, CloudFront, Route 53)

Git & GitHub (Version Control, Collaboration)

CI/CD (Jenkins Pipelines, GitHub Actions)

Terraform (IaC)

Ansible (Configuration Management)

Docker (Containerization)

MySQL, DynamoDB (Databases)

Linux (System Administration, Bash Scripting)

Tools & Technologies

- **Infrastructure as Code (IaC):** Terraform, Ansible
- **CI/CD & Automation:** Jenkins, GitHub Actions, Maven, Nexus, SonarQube, Tomcat
- **Cloud Platforms:** AWS (EC2, S3, VPC, Lambda, Route 53, RDS, CloudFront)
- **Containers:** Docker
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux (Ubuntu, CentOS, Amazon Linux)

Selected Cloud & DevOps Projects

Automated Resume Deployment Pipeline – Designed a CI/CD pipeline using **GitHub Actions**, **Node.js**, and **Puppeteer** to automatically generate and publish a PDF version of a resume from HTML/CSS. Implemented **idempotent automation** to update the latest release and commit the PDF back into the repository. Demonstrates artifact management, automation, and clean DevOps practices.

  [GitHub](#)

Infrastructure Deployment with Jenkins & Terraform – Automated AWS infrastructure provisioning using **Terraform integrated into Jenkins pipelines**. Enabled version-controlled, on-demand deployments triggered from GitHub commits, showcasing **Infrastructure as Code (IaC)** with CI/CD principles.

  [GitHub](#)

Infrastructure Automation with Terraform & Ansible – Provisioned AWS infrastructure using **Terraform** and automated server configuration with **Ansible**. Implemented idempotent playbooks to ensure consistent, reliable deployments across environments.

  [GitHub](#)

Complete Monolithic Java Web App Deployment on AWS – Provisioned a production-ready Java application using **Terraform** for IaC. Automated CI/CD pipeline with **Jenkins**, **Maven**, **Nexus**, **SonarQube**, and **Tomcat**, demonstrating end-to-end deployment automation and DevOps best practices.

  [GitHub](#)

Serverless Web Application on AWS (GUI) – Provisioned a serverless application using **AWS S3** for static content, **AWS Lambda** for backend logic, **Amazon API Gateway** for routing, and **DynamoDB** for persistence. Delivered a fully managed, cost-effective, and scalable architecture with zero server management.

Jenkins CI/CD Pipeline with Tomcat – Automated builds and deployments via Jenkins integrated with GitHub, streamlining continuous integration and delivery.

 [GitHub](#)

Highly Available 3-Tier LAMP Stack on AWS (GUI) – Provisioned a secure, scalable LAMP stack using the AWS Management Console. Configured **VPC, subnets, NAT, RDS, ALB, and EFS**, practicing cloud networking, storage, and load balancing fundamentals.

Certifications

AWS Certified Solutions Architect – Associate (In Progress)

Education

B.Sc. Geology – Al-Hikmah University, Ilorin, Nigeria, 2024
